-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of either JP360208869A or JP404234178A and further in view of JP02001358188A. AAPA discloses (Specification, Description of the Prior Art) well known semiconductor manufacturing processes comprising dividing a wafer. Both JP360208869A and JP404234178A describe well known laser cutting comprising the use of a resin layer wherein the laser is applied through a protective film. The use of a machining step in the AAPA in which the laser is shined through a protective film would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the film protects the workpiece from spatter. JP02001358188A describes both a resin sheet and the removal of the resin subsequent to processing. The use of any well known resin material, in sheet form or liquid form, and the removal thereof subsequent to processing would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the materials are well known in the art and cleaning is a normal post-processing step.

Conclusion

Art Unit: 1725

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to protective material usage.
